How To Plan And Build A 150 Bedded Hospital

Medicall
hospital needs expo

A 150 bedded hospital carries all the problems and attributes of a 500 bedded hospital but with the resources of a 30 bedded hospital. A 150 bedded hospital is a neither here nor there size. Building a new or upgrading a small hospital to a 150 bedded facility can be a challenging task. From vision, mission, margins, space planning & complete project planning you have to pretend like a corporate hospital but manage like a 30 bedded hospital.

HOSPITAL PROJECTS - HOW TO PLAN & BUILD A 150 BEDDED HOSPITAL?

APR 2024

11:00 AM TO 1.30 PM

A 150 bedded hospital carries all the problems and attributes of a 500 bedded hospital but with the resources of a 30 bedded hospital. A 150 bedded hospital is a neither here nor there size. Building a new or upgrading a small hospital to a 150 bedded facility can be challenging task. From vision, mission, margins, space planning & complete project planning you have to pretend like a corporate hospital but manage like a 30 bedded hospital.

COMMON FINANCIAL MISTAKES DONE BY SMALL & MEDIUM HOSPITALS

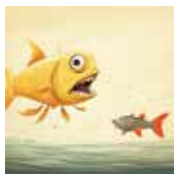

APR 2024

2:30 PM TO 5.30 PM

Understanding financial concepts and numbers are essential skills for any Hospital owner / administrator and rising Healthcare cost is a major problem. Hospitals are forced to give quality service at highly competitive prices. Newer regulations require rationalization of costs, which is essential for survival of many small and medium hospitals. Successful ones are those who understand this and manage their costs.

SURVIVAL STRATEGIES FOR SMALL & MEDIUM HOSPITALS

APR 2024

11:00 AM TO 1.30 PM

Small & Medium hospitals are concerned about the competition from bigger hospitals. Small & Medium Hospitals lack bandwidth and right resources when it comes to managing their hospital. This seminar focuses on survival strategies and practical solutions for running small & medium hospitals professionally and profitably.

10 THINGS TO KNOW TO RUN YOUR HOSPITAL BETTER

APR 2024

2:30 PM TO 5.30 PM

A hospital is a complex system of interrelated functions requiring constant movement of people and goods. The seminar will throw insights on important but neglected issues, like queue management, nurse call system, google my business, hospital analytics, laundry management, computer networking, ambulance management, oxygen supply chain, smart electricity, storage space planning. Gather wisdom from the professionals to run your hospital better.

5 IT SOLUTIONS BEYOND HMS TO RUN YOUR HOSPITAL BETTER

APR 2024

11:00 AM TO 1.30 PM

Implementing the right IT solution is critical to smooth functioning of any Hospital. Hospitals need to look beyond the traditional HMS for automating various processes and operations. With the advent of AI and innovative IT solutions in the market, Hospitals can incorporate these solutions to run and manage the Hospital. IT solutions are the crux of any Hospital operation. The seminar will highlight and demonstrate 5 IT solutions which are needed but neglected.

GIVE THE CARE
THAT **CONTINUES**

A comprehensive solution for healthcare providers looking to streamline their post-discharge follow-up process .

1

Improved Patient Outcomes

By ensuring that patients receive timely follow-up care and adhere to their treatment plans, hospitals can expect to see improved patient outcomes. This can result in reduced readmissions, complications, and overall better health for their patients.

2

Enhanced Data Insights

The data analytics provided by our application enable hospitals to gain valuable insights into patient outcomes, care plan effectiveness, and areas for improvement. These insights can inform decision-making, quality improvement initiatives, and resource allocation strategies.

3

Regulatory Compliance

Many healthcare regulations and quality standards emphasize the importance of post-discharge follow-up care. Using our application can help hospitals meet these requirements and maintain compliance with regulatory bodies, reducing the risk of penalties or legal issues.

4

Better Resource Planning

Hospitals can use the data and insights from our application to plan for future resource needs, such as staffing, equipment, and facility upgrades, based on patient volumes and needs.
